Technical requirements to banners:

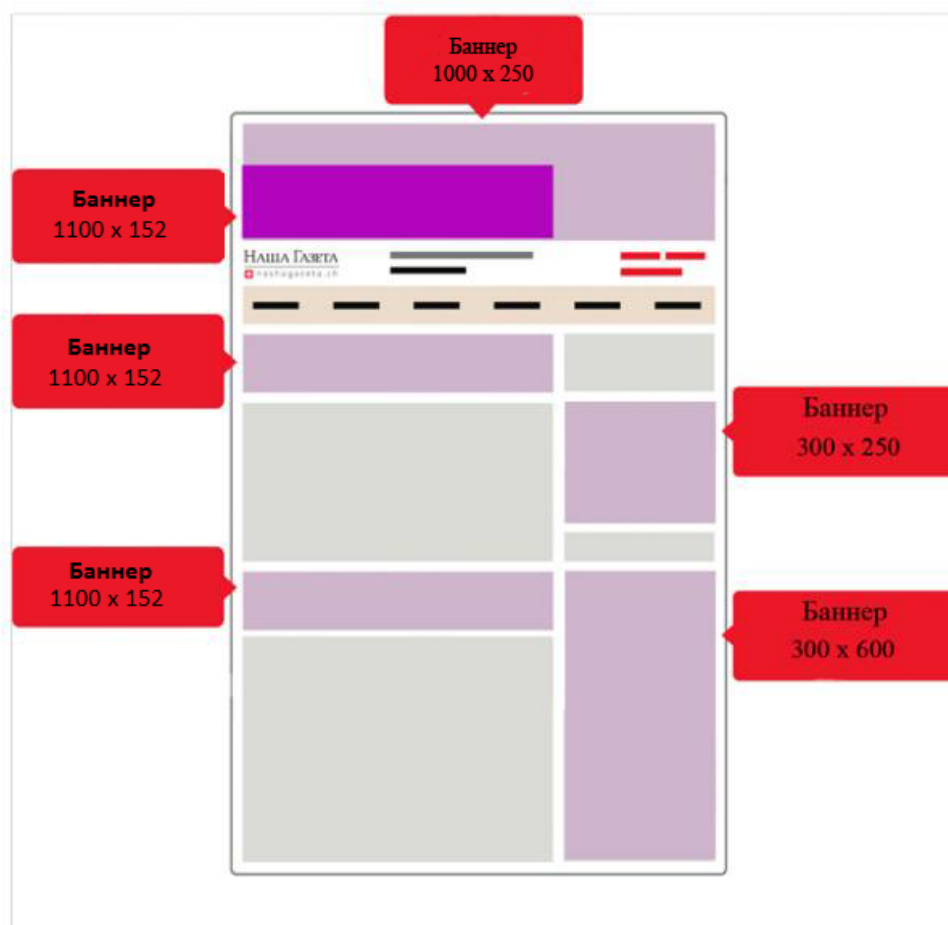

Format: GIF; JPG, SWF; Flash-banners must have a GIF, JPEG or PNG stub.

For the calculations of clicks on flash-banners use hard-coded URLs (i.e. the ActionScript links directly to a URL like '<http://www.example.com>'). The link may also be indicated with a clickTag variable ([details](#))

Flash files must contain objects performing only the functions of regulating animation; the objects regulating animation must not use more than 35% of the capacity of Celeron 1,5 GHz processor, in peak condition – not more than 60%.
